IT3120- Lecture 1

Introduction to Management Concepts

Management Approaches, Organizational Structure, Concept of Power and Motivational Strategies

1

Lecture Objectives

- What is an Organization?
- Primary Functions of Management
- Types of managers and their roles
- Key Management Approaches
- Organizational Behavior
- Organizational Structures
- Concept of Power in Organizations
- Motivational Strategies in the Workplace

2

ORGANIZATION

3

What is an Organization?

The word organization comes from:

- Medieval Latin *organizationem* = the act of organizing.
- Latin *organum* = "instrument, tool, organ."
- Greek word *organon* = "tool, instrument, implement."

The historical meanings evolved as follows:

- Early 15th century – "referred to the structure of a body or its organs"
- Mid-15th century – "the act or process of arranging parts into a functioning whole"
- Later (18th–19th centuries) – "a formally structured group of people working together toward common objectives"

4

What is an Organization

"Organization is the process of identifying and grouping work to be performed, defining and delegating responsibility and authority and establishing relationships for the purpose of enabling people to work most effectively together in accomplishing objectives." - Louis Allen

An organization is a structured group of people who collaborate to achieve shared goals. It features a defined hierarchy, assigned roles, and specific rules or processes to function efficiently. The term also refers to the act of planning, creating order, or the structural framework of a system

5

SLIIT as an Organization

People	Students, Lecturers, Instructors, Management Staff, Admin Staff
Goals	Providing Higher Education, Research, Professional Training, Graduate Development
Structure	Faculties, Departments, Programs, Non-academic units
Resources	Classrooms, Labs, Libraries, LMS, Technology, Finance, Staff Expertise
Rules & Process	Admissions, lectures, Exams, Grading, Student Support, QA
Leadership	Senior Management, Deans, Heads, Program Coordinators

6

MANAGEMENT

7

What is Management?

Henri Fayol (1841–1925). "**Management is the process of planning, organizing, leading, and controlling the efforts of organization members and of using all other organizational resources to achieve stated organizational goals**".

Mary Parker Follett (1868–1933), defined management as "***The art of getting things done through people***". She described management as a philosophy.

8

What is Management?

- The Definition of Management
  - Process of planning, organizing, leading, and controlling people in organization- effectively use resources to meet goals

- The Two Aspects of Management
  - People
    - The people with the responsibility and authority to determine the overall direction of the organization
  - Process
    - Decide what goals should be and defines them for the organization

9

Practice Question 1

In most cases, the management function includes which of the following?

a) applying and distributing organizational resources effectively
b) acquiring new resources when necessary
c) analyzing and adapting to the ever-changing environment in which the organization operates
d) complying with legal, ethical, and social responsibilities of the community
e) developing relationships with and among people to execute the strategies and plans
f) all of the above

10

Management Functions

Management can be understood through four key functions:

Together, these four functions provide a structured framework for understanding how managers coordinate people and resources effectively within organizations.

11

Management Functions

Planning
Planning involves setting organizational goals and determining the best course of action to achieve them. Managers identify objectives, develop strategies, and allocate resources in advance to guide future activities.

Organizing
Organizing refers to arranging resources and tasks in a structured way. This includes assigning responsibilities, grouping activities, and establishing relationships among team members to ensure efficient workflow.

Leading
Leading involves guiding, motivating, and influencing employees to work toward organizational goals. It includes communication, leadership, and creating a positive work environment to enhance performance.

Controlling
Controlling is the process of monitoring performance and ensuring that activities are aligned with planned objectives. Managers compare actual outcomes with expected results and take corrective actions when necessary.

12

1 Planning

- Defining goals and tackling them
- Defines future of organization- long-term plans
- Develops strategic plans
  - Long-term and effects entire organization
  - Bridges gap between what organization is and what it wants to be
- Tactical plans
  - Translate strategic plans into specific actions- who, what, where, etc.

13

2 Organizing

- Decides how to best implement the plans
- Decides how an organization is structured
- Assigns authority and responsibility
- Works to acquire resources
- Decides coordination

14

3 Leading

- Uses knowledge, character, and charisma- inspire achievement of goals
- Leads by communication, building commitment, creating shared values, and encouraging high performance
- Uses the power of granting rewards and punishments

15

4 Controlling

- Unexpected issues will arise
- Controlling
  - Monitoring activities, measuring performance, comparing results, making corrections
  - Observing and responding to what happens
- The feedback loop
  - most important aspect of controlling is that managers must be keep informed.

16

TYPES OF MANAGEMENT

17

Types of Managers and Their Roles

Describe the primary types of managers and the roles they play

1. Differentiate between the functions of top managers, middle managers, first-line managers, and team leaders

2 Differentiate between leadership, informational, and decision-making roles

18

Top-Level Management

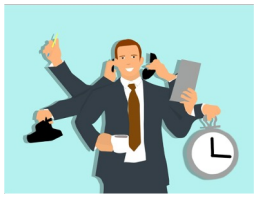

- What do these acronyms represent on a management team?
  - CEO, COO, CMO, CTO, CFO, CCO
- Vice Presidents or division heads sometimes part of top management team
  - Responsible for long-term success
- Set goals and pay careful attention to external environment
  - Economy, law proposals, consumer/public relations
- Make financial investments

19

Middle Managers

- Department heads, directors, chief supervisors
- Links between top and first-line managers
- Receives broad strategic plans with specific objectives
- Encourages, supports, and fosters employees
- Provides leadership

20

First-Line Managers

- Entry level- “on the line”
  - close contact with workers
- Responsible for organizational objectives and plans
- Assistant managers, shift managers, foremen, section chiefs, office managers
- Focuses on internal issues- must communicate

21

Team Leaders

- Reports to first-line or middle manager
- Develops timelines, specific work assignments, provides training to team, communicates clear instructions
- Makes sure team is operating efficiently
- Positions may be eliminated when new team must be formed

22

In Class Activity 1

23

Multiple Choice Question

Which of the following best describes effectiveness?

A. Completing tasks quickly

B. Using minimum resources

C. Achieving the desired goal

D. Reducing costs

24

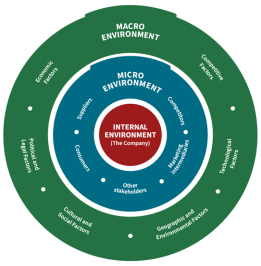

Short Answer Question

Give one example of *planning* in a real-life situation.

25

Organizational Environment

An organizational environmen refers to the internal and external forces, factors, and conditions that affect a company's operations, performance, and decision-making.
Organizations constantly interact with its surroundings to survive.

26

Organizational Behavior (OB)

Organization behavior is the study of how individuals, groups, and organizations as a whole think and function within its environment

OB is broken down into three levels :

- The Individual Level - It looks at the personal drivers and characteristics that shape how someone handles tasks, approaches obstacles, and interacts with others
- The Group/Team Level - Investigates how people function in teams. It explores how individual behaviors shift when placed in a collective or team environment.
- The Organizational Level - Views the company as a whole and how the organization functions in the broader market

27

Key Perspectives in OB

Perspective	Focus
Scientific Management	Most efficient way to do a job by breaking tasks into small steps and setting clear rules. It aims to increase productivity
Human Relations	Employees are people with feelings and social needs. When employees feel respected, supported, and part of a team, they perform better.
Contingency Perspective	No single best way to manage. The right approach depends on the situation (type of work, environment, and people involved).
Systems Perspective	Organization is a group of connected parts. If one part changes, it affects the others, so everything must work together smoothly.
Cultural Perspective	Shared values, beliefs, and habits within an organization guide how employees behave, communicate, and make decisions.
Critical Perspective	Power, control, and fairness in organizations. It questions whether employees are treated equally and ethically
Symbolic Perspective	Symbols, stories, language, and traditions help employees make sense of their roles and the orga help employees make sense of their roles and the organization's identity.

28

Management Approaches

Classical Approach - The Classical approach focuses on **improving efficiency and productivity through structure and control**. It emphasizes having a clear organizational hierarchy, well-defined roles, strict rules, and standardized procedures.

Behavioral Approach - This approach focuses on **people, motivation, and behavior at work**. It highlights that understanding employee needs, emotions, and relationships leads to higher satisfaction and better performance.

Quantitative Approach - This approach uses **mathematics, statistics, and data analysis** to support decision-making. It helps managers solve problems, optimize resources, and improve efficiency using models and calculations.

Modern Approach - This approach combines different ideas and focuses on **flexibility and adaptability**. It includes concepts like contingency thinking (no one best way), systems thinking (everything is connected), and the importance of culture and environment in managing organizations.

29

In Class Activity 2

30

Multiple Choice Question

Which approach focuses on employee needs and motivation?

A. Classical

B. Behavioral

C. Quantitative

D. Modern

31

Short Answer Question

Why is the contingency approach important in management?

32

ORGANIZATIONAL STRUCTURES

33

Types of Organizational Structures

Functional Structure

Employees are grouped based on **specialized functions** such as marketing, finance, or IT. This improves efficiency and expertise but may reduce communication between departments.

Divisional Structure

The organization is divided into **separate units based on products, services, or regions**. Each division operates more independently, allowing better focus but sometimes causing duplication of resources.

34

Types of Organizational Structures

Matrix Structure

Combines **functional and divisional structures**. Employees report to **more than one manager**. It improves flexibility but can create confusion in authority.

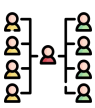

Flat Structure

Has **fewer levels of management** and a wider span of control. It encourages faster decision-making and better communication but may reduce clear supervision.

Tall Structure

Has **many levels of hierarchy** with clear authority and control. It provides strong supervision but may slow down decision-making and communication.

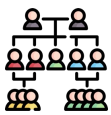

35

Types of Organizational Structures

Centralized Structure

Decision-making authority is **concentrated at the top levels** of management. It ensures consistency but may reduce employee involvement.

Decentralized Structure

Decision-making is **spread across different levels** of the organization. It increases flexibility and employee participation but may reduce consistency.

36

POWER

37

Concept of Power

Power in organizations refers to the **capacity of individuals or groups to influence decisions, behaviors, and outcomes**, often shaping how work is done and how resources are distributed.

It arises from various sources such as **position, expertise, relationships, and access to information**, and plays a key role in leadership, communication, and organizational dynamics.

38

Types of Power

Legitimate Power

Comes from a person's **position or role** in the organization (e.g., manager). Others follow because they recognize this authority.

Reward Power

The ability to **give rewards** such as promotions, bonuses, or recognition to influence others.

Corrective Power

The ability to **punish or discipline** others (e.g., warnings, demotions), which creates compliance through fear.

39

Types of Power

Expert Power

Comes from a person's **knowledge, skills, or expertise**. Others followbecause they trust their competence.

Referent Power

Based on **personal qualities, charisma, or relationships**. People follow because they like or respect the individual.

Information Power

Comes from having **access to important information** and the ability to share or control it.

40

MOTIVATION

41

Motivation

Motivation refers to the **set of internal drives and external influences that initiate, direct, and sustain a person's behavior toward achieving goals**.

It explains **why individuals choose certain actions, how much effort they put into those actions, and how long they continue despite challenges or obstacles**.

In an organizational context, motivation is shaped by factors such as **individual needs, expectations, rewards, work environment, and leadership**, and it plays a critical role in determining employee performance, commitment, and job satisfaction.

42

Types of Motivation

Intrinsic Motivation

- Comes from **within the individual**.
- Driven by **internal rewards** such as enjoyment, curiosity, learning, or personal growth.
- Often leads to **higher creativity, better engagement, and long-term commitment**.

Example: An employee works on a project because they **enjoy solving problems and learning new skills**.

Extrinsic Motivation

- Comes from **external factors or rewards**.
- Driven by **external rewards or pressures** such as salary, bonuses, promotions, grades, or avoiding punishment.
- Effective for **short-term performance and structured tasks but** may not always lead to deep engagement.

Example: An employee works hard to **earn a bonus or get promoted**.

43

Key Aspects of Motivation

Direction of Behavior

What a person chooses to do. Motivation influences the goals, that an individual focuses on. For eg, an employee may choose to focus on completing a project quickly or improving quality guided by their motivation.

Level of Effort

How hard a person tries to achieve a goal. Even if two people choose the same task, their level of motivation determines how much energy, time, and commitment they invest.

Persistence

How long a person continues to work toward a goal, especially when facing difficulties. Motivation helps individuals stay committed and not give up easily, even when tasks are challenging or progress is slow.

44

Maslow's Hierarchy of Needs

Abraham Maslow proposed that human needs are arranged in a **hierarchy (from basic to higher-level needs)**, and people are motivated to satisfy lower-level needs before moving to higher ones.

45

Five Levels of Needs - Maslow's Hierarchy

1. **Physiological Needs:** Basic survival needs such as **food, water, rest, and salary** to meet daily living.
2. **Safety Needs:** Need for **security and stability**, such as job security, safe working conditions, and financial protection.
3. **Social Needs:** Need for **belonging and relationships**, including teamwork, friendships, and a sense of community at work.
4. **Esteem Needs:** Need for **respect, recognition, and achievement**. Employees want to feel valued and appreciated.
5. **Self-Actualization:** The highest level, where individuals seek **personal growth, creativity, and reaching their full potential**.

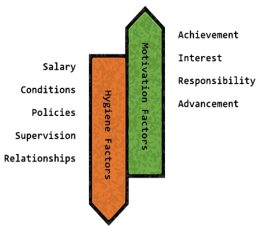

46

Herzberg's Two-Factor Theory

Frederick Herzberg suggested that job satisfaction and dissatisfaction are driven by two entirely different sets of workplace factors:

Hygiene Factors (which prevent dissatisfaction)

Motivators (which actively drive engagement and satisfaction)

47

Herzberg's Two Types of Factors

1. Hygiene Factors (Prevent Dissatisfaction)

These are **basic job conditions**. If they are poor, employees become unhappy but improving them does not strongly motivate.

Examples:

- Salary
- Company policies
- Working conditions
- Job security
- Relationships with supervisors

48

Herzberg's Two Types of Factors

2. Motivators (Create Satisfaction)

These factors **truly motivate employees** and lead to higher performance and satisfaction.

Examples:

- Achievement
- Recognition
- Responsibility
- Personal growth
- Meaningful work

49

Applications of Digital Technologies in Management

1. Decision-Making Support tools
2. Performance Management tools
3. Communication and Collaboration
4. Automation of Routine Tasks (scheduling, reporting etc)
5. Employee Motivation and Engagement (personal feedback etc)
6. Predictive Analytics
7. Learning and Development (training etc)
8. Ethical and Control Considerations (privacy etc)

50

In Class Activity 3

51

Multiple Choice Question

Which of the following is an example of intrinsic motivation?

A. Working for a bonus
B. Working to avoid punishment
C. Working because you enjoy the task
D. Working for promotion

52

Short Answer Question

Name one type of power and give a simple example.

53

Homework

55
